Projects

Fuzzy Multi-criteria Decision-making   Aug 2024 - Present

I built a hybrid solution using Next.js for the front end and FastAPI for the back end, allowing me to leverage Python (Pulp) to solve complex linear programming problems. This project is currently still in the prototyping phase.

My Resume   Jan 2024 - Present

I enjoyed creating my own resume using Next.js. It's a one-page static website, and I added some cool animations with Particles.js. I hope you like it!

Mpsy   Jan 2023 - Jul 2023

I worked on a Node.js event-driven microservices project, contributing by adding the logic for user appointment scheduling, as well as designing the calendar interface. I also developed other pages and components, like the 'Nos Psy' page.'
